

Battery export in Naypyidaw

Where did Chinese battery manufacturers go in 2022?

For example, CATL went to Indonesia, EVE Battery went to Malaysia, and Gotion High-Tech went to Vietnam and Thailand. On the whole, compared with previous years, the pace of Chinese battery manufacturers' exports, overseas factory construction or investment will be significantly accelerated in 2022.

Which companies are importing batteries from overseas car companies in 2022?

In 2022, CATL, Sunwoda (??), EVE Battery (????), Gotion High-tech (????), etc. have successively announced that they have won large orders for batteries from overseas car companies, and at the same time stepped up the establishment of overseas factories to support customers nearby.

Why is China a good place to invest in lithium batteries?

China has abundant lithium resources and a perfect lithium battery industry chain, as well as a large basic talent pool, making mainland China the most attractive region in the world for the development of lithium batteries and its material industry, and has become the world's largest lithium battery material and battery production base.

Which country makes the most lithium ion batteries in the world?

From a global perspective, China currently dominates the global lithium-ion manufacturing market. 2022 global installed power battery capacity is about 517.9 GWh. Among the top ten companies in terms of installed capacity, Chinese power battery companies occupy six seats, with a combined market share of 60.4%.

How big is China's power battery production in 2022?

According to public calculations, in 2022, China's power battery production totals 545.9 GWh, meanwhile, the installed volume is only 294.6 GWh, accounting for 53.96%, even with 108.1 GWh of battery exports and exports with the vehicle, the ratio is only 73.77%. China's overcapacity has become an established fact.

Why are Chinese battery companies expanding overseas markets?

Therefore, lithium enterprises are actively broadening overseas markets, which will make the subsequent development of more market impetus. In addition to packaging and exporting, Chinese battery manufacturers have also begun to directly build factories overseas or invest in overseas battery manufacturing projects.
