

Does the new energy range extender have a battery

What is the energypak plus range extender?

The EnergyPak Plus range extender is a lightweight and compact backup battery that attaches to your E-bike so you can worry less about running out of battery on epic rides. With 250Whr of additional capacity, the EnergyPak Plus boosts your range by 40 percent for bikes with the standard EnergyPak Smart 625Whr battery.

Does giant ebike have a range extender?

8. July 2021 Since 2020, Giant has been offering a smaller additional battery with the range extender called EnergyPak Plus. With it, you can easily expand the capacity of your Giant or Liv ebike and increase the range of the system. In addition to the different main batteries, the EnergyPaks from Giant, 250 watt hours are added.

What is the giant energypak plus - range extender 250 Wh battery?

The additional Giant EnergyPak Plus - Range Extender 250 Wh battery offers the possibility of increasing the on-board capacity of your Giant electric bike already equipped with an integrated 500 Wh or 625 Wh battery.

How does the giant range extender work?

As soon as the main battery has reached a capacity of 1-2%, the Giant Range Extender is activated and emptied. The EnergyPak Plus battery is recharged via the e-bike's charger using the adapter plate. This means that an additional charger is not necessary. Charging can take place anywhere there is a power socket.

What is the energypak ebike range extender?

The EnergyPak is a convenient range extender for numerous ebikes from Giant and Liv. If you want, you can also use it as a power bank.
