

# Energy Transformation Where can I buy solar panels

Do you offer solar panels for sale in the UK?

Since 2010, our friendly UK team have helped tens of thousands of people install the right Solar PV system, and we are keen to support you today and offer PV solar panels for sale. PV Solar Panels generate emission-free, clean electricity every day of the year in the UK and can vastly reduce your energy bills.

Do solar panels increase the value of a home?

A report by Solar Energy UK found that solar panels could increase the value of a typical home by up to £2,722. They could also make your home more attractive to future homeowners, because of the savings on energy costs. Will a government grant cover the costs of my solar panels?

How much can you save with solar panels?

How much you can save on your energy bills with solar panels depends on a few factors, including: the size of your solar panel system, the amount of energy your household normally uses, and the cost of electricity in your area. As sunlight is a free resource, a typical solar panel system can save you around 50-70% on your electricity bills.

How much do solar panels cost?

The average domestic solar panel system costs around £7,000, including installation costs, according to the Energy Saving Trust. However, solar panel costs can vary depending on several factors:

Should you buy a solar PV system for your home?

Well-chosen solar panels can provide a reliable source of renewable electricity for decades, helping to slash your electricity bills and cut your carbon footprint. But buying an inappropriate solar PV system for your home could leave you out of pocket.

Can solar power save you money?

Solar electricity is a clean, renewable energy source. A typical home solar panel system could save around one tonne of carbon per year, depending on where you live in the UK. That's the equivalent of driving 3,600 miles, or from London to Bristol 30 times. Export the electricity you can't use yourself and get paid for it.
