

Home energy storage power station rental information

How long can I rent a battery energy storage system?

Rental periods can vary from a few weeks to even years. With no upfront cost and competitive rental fees, we guarantee that our battery energy storage systems deliver 24/7 round-the-clock reliability and 100% peace of mind.

What is a battery energy storage unit (BES)?

Battery Energy Storage (BES) Units / Hybrid Generators: Ideal for reducing fuel consumption and emissions. They can be combined with a diesel generator or used stand-alone. HVO Fuel Generators: Utilise hydrotreated vegetable oil (HVO) as a cleaner alternative to diesel. Assessment: We conduct a site survey and/or a power requirement analysis.

What is a Battery Storage Unit (BSU)?

A battery storage unit (BSU) can be installed alongside other power solutions such as fuel powered generators and solar arrays. They are proven to significantly reduce fuel consumption, costs and emissions. Sunbelt Rentals have the UK's largest fleet of battery storage units (BSUs). When should I use a Battery Storage Unit?

What is a single battery energy storage unit?

Single battery energy storage units can be easily combined to deliver the power and energy capacity required for your business - from 30 kVA to multi-MW - and can cover a variety of applications, providing flexible, reliable, and cost-effective power. Small switch. Big difference.

What are the benefits of a battery energy storage system?

Operational and maintenance services, remote monitoring and performance guarantees are all included in our battery energy storage solutions. Working together, this new fleet enables businesses to operate with greater efficiencies, low noise levels, and reduces emissions.

What onsite re-fuelling services does power electrics offer?

Power Electrics offer onsite re-fuelling services to ensure your generators run smoothly without any interruptions. We provide both white diesel and HVO fuel options to suit your specific needs. Our team offers scheduled and emergency re-fuelling, handling all logistics so you can focus on your core operations.
