

How to install industrial and commercial solar energy

Should you install solar panels on your commercial property?

There are many advantages for businesses that choose to install solar panels on their commercial property. Solar power provides a cost-effective solution for companies looking to reduce their energy consumption. Commercial solar panel installations can have a payback period of as little as five years.

Are commercial solar panels a good investment?

Commercial solar panel installation can bring many benefits: Over the 25-year lifetime of solar panels, savings can equate to thousands of pounds. A 20kW system can potentially save businesses over £3,000 annually on their electricity bills. Solar panels allow for energy independence and some level of insulation from fluctuating electricity prices.

Should you switch to commercial solar panels for your business?

By switching to commercial solar panels for your business, you are also lowering your carbon footprint along with the operating costs. Solar energy is also renewable and carbon neutral, which could improve your reputation. Switching would indicate your business's commitment to green and sustainable practices and energy conservation.

What are industrial solar panels?

Industrial solar panels are large-scale photovoltaic systems that generate electricity from sunlight for commercial and industrial purposes. They are different from residential solar panels in terms of their size, capacity, installation, and financing.

Are commercial solar panels right for your business?

Commercial solar panels can be beneficialregardless of whether your company is large or small. Most businesses are active in the daytime, which means they are the perfect candidates for utilising solar panels and enjoying the cost savings that come with them. Let's see if commercial solar panels will be right for you.

How much do commercial solar panels cost?

A way to estimate the installation costs of commercial solar panels is to calculate 0.2p per Watt fitted. That would mean it can cost approximately £2,000(excl. VAT) to install a 10kW system. For large commercial systems, it may take multiple workers to install them, and the more people required, the higher the costs.
