

# How to install solar panels legally

Are DIY solar panels legal?

Yes. DIY solar panel installation is perfectly legal. However, installing DIY solar panels requires you to assume some legal responsibilities. You'll need MCS certifications to sell your home with the panels included. MCS is a mark of quality that demonstrates the installer and solar panels meet the highest standards.

Can I install solar panels without planning permission?

If you live in a house with permitted development rights you can install solar panels without planning permission, subject to certain conditions and limitations. These rights may vary based on location and property type, so you must check with your local planning authority.

Can I install solar panels if I don't meet building regulations?

Your local authority can also apply for a Confiscation Order to take away any money you've earned with your system - so there's absolutely no benefit to installing solar panels that don't meet building regulations. It's crucial that your solar installation follows all building regulations.

Is it illegal to install solar panels on a residential property?

A do-it-yourself solar panel installation is not illegal. You'll typically not need planning permission to install solar panels on the roof of your residential property. You'll need permission to install solar panels on a listed property or a conservation area.

Can I install solar panels on my property?

If your property is situated in a conservation area, it may be possible to install solar panels under Permitted Rights. However, if the panels are to be installed such that it would be visible from a highway, a planning application and consent from the local authority will be necessary.
