# How to restore the battery in the communication network cabinet

How do I swap out the battery in my NBN connection box?

To swap out that tired old battery in your NBN connection box, just follow these steps: Safety First: Make sure everything is powered off before you start - safety is key! Accessing the Battery: Pop open the Power Supply with the Battery Backup unit to get to the battery.

Should I replace my NBN battery?

Replacing your NBN battery is essential to ensuring your network stays operational during a power outage. It's a straightforward process,but it's important to consider the costs involved. To swap out that tired old battery in your NBN connection box,just follow these steps:

How do I install a new NBN battery?

Introducing the New Battery: Slide the new NBN battery in,ensuring those retaining tabs snap back in to secure it. Making the Connections: Reconnect the red positive plug to the '+' terminal of the new battery,then hook up the black negative plug to the '-' terminal.

What is a NBN battery & why is it important?

The NBN battery is a critical component that keeps your Fibre to the Premises (FTTP) connection alive during a power outage,ensuring that you can still make phone calls and stay online. It's essential to know when it's time for a battery replacement.

What battery does a NBN power supply use?

Most NBN Power Supply Units use a standard 12V 7.0 to 7.2Ah 6 cell SLA batterywith F2 terminals. You can purchase this battery from a variety of retailers,or check with your service provider in case they supply them. Before you get started,remember to have your safety gloves on and read through the instructions completely.

How do I know if my NBN battery is bad?

Beeping: This is your primary indicator. If the NBN unit beeps once every 15 minutes,it's a sign the battery is going flat. Alarm Silence Button: Pressing this will stop the beeping for 24 hours,but if it starts up again after this period,you need to look into replacing your battery.
