

Is it good to use solar panels to power your home

Should you add solar panels to your home?

This isn't the case for renewable electricity tariffs sold by energy suppliers. Adding solar panels improves the energy performance of your home, too, and can boost your energy performance certificate (EPC) rating. Live more sustainably: get our free monthly Sustainability newsletter to make eco-friendly changes for you, your home and the planet

Are solar panels a good idea?

cheaper bills for years to come. Reduce your carbon footprint By harnessing low carbon solar electricity, a typical home solar panel system could save around 800kg of carbon a year depending on where you live in the UK. This makes solar a great way to cut your carbon footprint. New solar installations more than do

Why should you install solar panels on your home?

Installing solar panels lets you use free, renewable, clean electricity to power your appliances. You can sell extra electricity to the grid or store it for later use. There are over 1.3 million installations on homes across the UK - see where the UK solar panel hotspots are.

Can solar panels power a house?

While solar panels have the capability to generate enough electricity to power a house, there are a few variables that should be considered before making the jump to running your home completely on solar energy. The design of the house and the roof's surface will impact how many solar panels you will be able to have installed.

Are solar panels right for you & your home?

So, how do you know if they are right for you and your home? There are many benefits of solar panels. Not only will they generate clean energy, but they will provide energy all year round, and their life span is around 25 years, making them a good investment.

Are solar panels worth it?

The pros of solar panels are immense, and if you can afford the upfront cost they are absolutely worth getting. With solar panels, the average three-bedroom home will save £454 a year on their energy bills. And if you're exporting excess electricity to the grid via the SEG, you'll make an additional £160 per year.

A solar system with a battery can help you power your home during an outage or blackout. Overall, solar panels add stability and flexibility to the electricity you get from the grid.
