

# Latest news on national energy storage policy

Should the UK invest in a strategic reserve of electricity storage?

A strategic reserve of electricity storage is a critical investment to secure the UK's energy supply against future shocks, but the Government is still equivocating over whether it is necessary to invest in one. "Since 2023, the Government has had a Department for Energy Security and Net Zero.

Does the government have a clear plan for energy supply risks?

"In light of the huge economic damage the recent energy crisis has caused, it is distressing to see that the Government lacks a clear plan for energy supply risks and indeed is still deliberating over investment in energy storage to prevent future crises." Baroness Brown of Cambridge, Chair of the House of Lords Science and Technology Committee.

Could long-duration energy storage technology be a key to energy security?

Baroness Brown of Cambridge, Chair of the House of Lords Science and Technology Committee. A House of Lords committee has warned the Government that it must act fast to ensure long-duration energy storage technologies can scale up in time to play a vital role in decarbonising the electricity system and ensuring energy security by 2035.

Why is energy storage so important in the UK?

Minister for Energy Security and Net Zero Graham Stuart said: Storing energy for longer periods is vital to build a robust and secure energy system and ensure that renewable energy is used efficiently. Fortunately the UK has a wealth of pioneering businesses that are making their mark on this industry.

Which energy companies are planning a huge £300m energy storage facility?

An energy firm starts work on a huge £300m facility in Trafford to store excess power as liquid air. Labour plans to create a publicly-owned company called Great British Energy based in Scotland. Staterra Energy wants to build a battery energy storage system at Culham Campus in Oxfordshire.

Can renewables and energy storage save the UK's economy?

"The combination of renewables with energy storage will enable the UK to build an economy insulated from dependence on volatile energy markets and imported fossil fuels. But storage isn't just about batteries.

In addition, the "Energy Law of the People's Republic of China (draft for comment)" encouraged the development of smart grid and energy storage technology. The ...

3 ???&#0183; Novus Renewable Services also said the development will support energy security, provide low-cost energy, help avoid power cuts and that there will be a contribution to local ...
