

# Lead-acid battery pack replacement

What is the best battery to replace lead acid batteries?

With better performance, LiFePO<sub>4</sub> is the most promising battery technology to replace Lead Acid Batteries. AntBatt lithium ion Phosphate (LiFePO<sub>4</sub>) Battery pack is designed as lighter-weight, longer-lasting replacement for lead acid batteries.

Can you replace lead acid batteries with lithium ion?

Instead of replacing them with a new set of lead-acid batteries, it is time to consider replacing lead acid with lithium ion, the newer renewable energy storage option. And when you do, here is how you do that. Can I Replace Lead Acid Battery with Lithium Ion? Replacing lead acid batteries with lithium ion is possible.

What is a lead-acid battery?

Lead-acid batteries have been around for over 150 years and have been the go-to battery for many applications. They are a type of rechargeable battery that uses lead plates immersed in sulfuric acid to store energy. They are commonly used in cars, boats, RVs, and other applications that require a reliable source of power.

Are acid batteries maintenance-free?

In stock - Ready for dispatch In these batteries the acid mixture (electrolyte) is liquid. Acid batteries vent through the openings provided for this purpose. Some types require maintenance by topping up with distilled water at regular intervals. In the product descriptions you will find information whether the battery is maintenance-free.

How to remove a lead-acid battery from a car?

Remove the connections between the batteries and take each lead-acid battery out one at a time. Put them in a dry place till you can safely get rid of them. Place the lead-acid batteries in the vehicle's metal casing. Connect the positive of the connectors wires to the positive terminals of the battery and do the same with the negatives.

Why is my lead acid battery charging directly from my alternator?

If your lead acid battery was charging directly from your car's alternator, you need to make some changes. Lithium batteries have a low internal resistance. It will demand as much current from the alternator as it can handle, leading to overheating or even burning out of your alternator. Victron did a great video about this:
