

Rent out the roof to build solar panels

Can a rent-a-roof company install solar panels?

Where an installation is owned by a rent-a-roof company, we would expect there to be a signed 'agreement' between the relevant parties, i.e. the homeowner and the rent-a-roof company, such as a lease agreement, with the homeowner agreeing to rent their roof to the company for the purposes of installing solar PV panels.

How do rent-a-roof solar panels work?

Rent-a-roof solar panel schemes required homeowners to give a solar company the rights to their rooftop or the airspace above it for up to 25 years. That company would then install rooftop solar panels for free, in return for receiving the household's Feed-in Tariff payments.

What is a solar panel rent-a-roof scheme?

The Rent-a-Roof scheme lets people who can't otherwise afford solar panels gain access to them, through installers who will set up solar panels on roofs for reduced prices. Installers can then sell any excess electricity generated back to the grid.

Are solar panels paying rent for your roof?

Technically, they're not paying rent for your roof, because you'll get the benefit of powering your home using solar power instead of grid electricity. They'll make money from the electricity you don't use. All excess electricity generated is sold back to the grid via the Smart Export Guarantee (SEG) scheme.

How many homes have a rent-a-roof solar panel scheme?

While the Feed-in Tariff was in effect, more than 900,000 homes in the UK had solar panels installed - so we can estimate that around 27,000 households signed up for a rent-a-roof scheme. What were the problems with rent-a-roof solar panel schemes?
