

Senna battery pack cannot be fully charged

Does a Sena 50R have a good battery life?

I have had a Sena 50R just over a year. I absolutely love the device. Recently, it would charge for just a few minutes and then turn blue as if it were fully charged. I read online about some defective batteries in the 50S model, but everyone says the 50R has a great battery life. I have tried everything from firmware to a fault reset.

Can a Sena 50s battery be replaced?

I'll update here if we can fix the problem in another way. I had a battery issue with my Sena 50S as well. If your unit is within warranty, Sena will replace it. However if it is out of warranty you can replace the battery yourself if you are inclined to.

Should a Sena 50s be recalled?

With so many people reports the same problem. I should have to pay to ship the product to Sena. The 50s should just be recalled for the battery problems. Sena should be shipping replacement units and send us a return label, instead of us paying for the shipping. The agent #5 told me the its on the website.

Does Sena have a warranty?

Still no fix. Does anyone have any idea what could be happening? These come with a 5 year warranty, at least in the states. Reach out to Sena first. They've handled warranty repairs for me pretty well in the past.
