

Solar power supply high voltage distribution cabinet does not flash during the day

How to maintain a faulty solar inverter display?

To maintain a faulty solar inverter display, you can proceed with the following steps: Begin with turning off the input PV switch on the photovoltaic inverter side. Next, disconnect the PV input DC switch and finally, switch off the battery switch.

Why is my Solis solar inverter NOT working?

Solis solar inverters are powered by the solar panels (the DC supply) and will startup at sunrise each day and shutdown at night. If you find the solar inverter with no lights or display working during the day, there is either a problem with the solar panels or with the solar inverter.

Why is my solar inverter NOT working during the day?

If you find the solar inverter with no lights or display working during the day, there is either a problem with the solar panels or with the solar inverter. Follow the shutdown and restart procedure outlined above and if the problem persists Contact us to discuss the next steps.

Why does my solar inverter keep shutting down?

Wait for Inverter Restart: The inverter might temporarily shut down due to high bus voltage caused by its protection mechanisms. Please wait for it to automatically restart again. Contact Manufacturer: If the error continues after the restart, get in contact with the manufacturer or your solar installer.

Why is my solar inverter not measuring a grid voltage?

*NO-GRID - No grid voltage - The solar inverter is not measuring a grid (mains) voltage suggesting that mains power to the unit has been disconnected. If this fault persists and mains power is available to other local circuits then check that all isolators, MCBs and RCDs on the AC side of the solar PV system are 'On'.

What if my solar inverter has a fatal error?

*12Power-FAULT - 12V power supply fault - If after the system has been safely shutdown and restarted this condition persists the inverter has a fatal error and should be replaced. There are a few ways that we can help with this: Solar Inverter Replacement
