

## The battery in the capacity cabinet is installed upside down

Where should a lithium battery be placed?

This gives you the flexibility to install the battery where it is best suited for your application. Here are further details regarding Battery Orientation from our User Manual: Lithium batteries can be placed upright or on their sides. Do not install batteries in a zero-clearance compartment, overheating may result.

Can LiFePO<sub>4</sub> batteries be placed upright?

Yes, because there is no fluid inside of LiFePO<sub>4</sub> batteries. This gives you the flexibility to install the battery where it is best suited for your application. Here are further details regarding Battery Orientation from our User Manual: Lithium batteries can be placed upright or on their sides.

Where should batteries be placed?

When installing batteries in a cabinet or on a rack, start at bottom & finish with placement at the top. Batteries may release flammable gas. Batteries must keep away from any possible source of flames or sparks.

Can a battery be installed horizontally?

Models installed horizontally may not be mounted on the end (shortest side), should not rest on the cover or case/cover seam, and must be supported fully on the long side of the case. Use caution not to cover or apply pressure to valves located on the top of the batteries when using strapping to install or secure cells as damage may occur.

How do I assemble a battery rack/enclosure?

To assemble a battery rack/enclosure, please see rack installation instructions. Connect battery modules together to the required system voltage, then connect battery string with charger or load; When multi-strings of batteries are to be parallel connected, connect batteries in series first and then complete the parallel connection.

What if the battery pack is over 45V?

Do NOT dispose of the batteries in water, fire, and do not heat the batteries. If the voltage of battery pack is above 45V, please be sure to wear insulated gloves when working; otherwise, there is a risk of severe electrical shock.

Hi Kimmo, I have installed 4 x US 3000 in their own Pylontech supplied cabinet, they are installed vertically, see attached picture, so answer to your question is yes.... Cheers Dave...

This should be documented by the battery manufacture on which way is safe to orient based on how the cells are oriented inside the case, but sadly, almost never is. Best ...

## The battery in the capacity cabinet is installed upside down

Hi Kimmo, i have installed 4 x US 3000 in their own Pylontech supplied cabinet, they are installed vertically, see attached picture, so answer to your question is yes.... Cheers ...

Current value C is rated capacity of battery. Example: rated capacity of 2V300AH battery is 300AH,  $0.1C (A) = 0.1 \times 300 = 30A$ ; 6.2 Discharge Ensure the maximum allowable ...

Some sealed lead acid batteries are orientation agnostic, some are not. If it's AGM or Gel they could be upside down or sideways. If it's conventional sealed lead acid it's ...

VRLA batteries can virtually be installed in any position. However, you should definitely try to avoid installing your VRLA battery upside down. Though VRLA batteries are ...

Here are further details regarding Battery Orientation from our User Manual: Lithium batteries can be placed upright or on their sides. Do not install batteries in a zero-clearance compartment, ...

Flooded lead-acid batteries must be kept in an upright position at all times as electrolyte may spill if tilted more than 20 degrees. Rolls VRLA AGM batteries should be ...
