

The battery is fully charged and there is still current sound

Why does my battery make a noise when charging?

There are going to be some sort of sine with distortion and noise coming from your wall and while it's charging the chargers doing what it's supposed to do, but when your battery is fully charged, the filtering noise occasionally get loud on certain chargers.

Why does my laptop not make a sound when charging?

No sound comes when the laptop is charging below 100%. What could be the reason? It could be the battery, the charger, or the power regulation subsystem in the laptop itself. If you have another battery, use that instead. If you have another charger, try that instead.

How do I know if my battery is fully charged?

I would like to inform you that there is no sound setting or alert when the battery is fully charged. You will see a battery logo filled with green color with a plug beside the battery when it is fully charged. Hope this information is helpful. Visit our Microsoft Answers Feedback Forum and let us know what you think.

What if my laptop battery is not fully charged?

If your laptop battery is not fully charged or about to drain, plug in the charger and turn on the power supply to charge the battery. You can continue your work while your laptop is charging. However, if you experience issues, you can contact support. Read next: Laptop Battery drains after shutdown.

How do I set a sound when a battery is charged?

Or download "battery full notification" app from the play store. This allows you to set a sound when the charge reaches a percentage of your choosing. (better for battery life if you don't charge more than 95 percent each time). 16-02-2022 06:52 PM

Is it normal to hear a buzzing noise when charging?

It is normal to hear a little buzzing noise when you are charging your device, however, if you feel that the buzzing noise is far from normal it is possible that the charging port or adapter is damaged. Check the AC adapter and cables (including the power cable) for any signs of physical damage. Also, try to connect to a different wall outlet.

Instead, the charge level is measured by a Coulomb counter. These devices measure the current leaving/entering the battery (just like an Ammeter would), and integrate this to get an estimate ...
