Could China's 'all-time high' solar power supply cause a price drop?

Pent-up demand from what one source calls "all-time high" procurement, with China's National Energy Administration approving a third batch of Gigawatt-base power projects, means falling prices could find a floor. According to the China Photovoltaic Industry Association, the country is set to install up to 120 GW of solar power in 2023.

How many solar panels will China install in 2023?

According to the China Photovoltaic Industry Association, the country is set to install up to 120 GW of solar power in 2023. But manufacturers should have big module inventories accumulating, noted another source, which if unleashed on the market may suggest more downslides on the horizon.

Why is China's solar energy industry struggling?

China's solar energy industry has been grappling with severe oversupply and aggressive price competition in the local market since 2024. In late October, the China Photovoltaic Industry Association (CPIA) collaborated with executives from Tier 1 solar... The article requires paid subscription. [Subscribe Now](#)

Does eschewing cheap Chinese solar panels slow the energy transition?

Though the trade dynamics of solar modules and fossil fuels differ, overwhelming reliance on any one country, particularly a hostile country, poses a real security threat. Critics of the Biden Administration's green protectionism argue that eschewing cheap Chinese solar panels slows the energy transition. This may partly be true.

Does China have a solar power supply chain?

As a result, a recent study found that solar panels manufactured in China produce 30% more greenhouse gas emissions than if this supply chain was reshored to the U.S. Furthermore, China's continued solar dominance jeopardizes the security of the U.S. and its allies.

Are Chinese solar panels cheaper than US solar panels?

Yet, while Chinese solar panels are 20% cheaper than their American equivalents, this number is not the difference between the success and failure of the U.S. solar energy industry. High interest rates and the permitting quagmire must also be addressed. Ending China's dominant position in the global solar market is not possible.

McDonald's China's first integrated solar and energy storage 'zero-carbon restaurant' opened! ...
