

Use battery pack as mobile power source

What is the best portable battery pack?

For reference, a capacity of 512Wh is roughly 7x more than our top pick for best portable battery pack, the Mophie PowerStation XXL. While it's not realistic to know how you'll use the power station in the future, try to guesstimate the number of ports and outlets you'll need. Here's the technical part.

Are portable power stations a good option for home battery backup?

Luckily, home battery backup has become more affordable and advanced than ever. Portable power stations (PPS) provide the answer when you're looking to provide energy security for your home.

What makes a power station a 'portable' battery?

Portability: The term "portable" is stretching it sometimes. Batteries are heavy. The larger-capacity power stations are typically on wheels and have telescopic handles, and they are still tough to cart around. If you're looking for something you can actually carry on foot for a distance, you may need to temper your expectations on capacity.

How do I use a portable power station?

Make sure to follow the instructions provided by the manufacturer to avoid damaging your devices or the portable power station. Turn on the portable power station: Once your devices are connected, turn on the portable power station. This will begin delivering electricity to your devices.

What can I use to charge my portable power station?

This may include a wall charger, a car charger, or a solar panel. Avoid using third-party charging equipment, as this may not be compatible with your portable power station and could damage the battery.

How much power does a portable power station provide?

The amount of power a portable power station can provide is measured in watts. When shopping for a portable power station, it's important to consider the wattage you need to power your devices. For example, if you need to power a laptop and a smartphone, you may only need a portable power station with a few hundred watts of power.

For a more inexpensive option, Wirecutter also liked the RAVPower 27000, which offers 700 W of power for \$130 but has an "unwieldy charging cord and power brick." These ...
