

What to do under the solar panels

How do I stop pigeons from nesting under my solar panels?

The best methods include the following: One of the most effective and humane methods to deter pigeons from nesting under your solar panels is the installation of bird mesh. Bird mesh, or solar panel mesh, is a durable and non-intrusive barrier that prevents pigeons and other birds from accessing the area beneath your solar panels.

How to clean solar panels?

Cleaning under solar panels involves removing any debris like leaves or branches that may have collected there. You can use a long-handled broom or air blower to gently remove the debris without damaging the panels. You should avoid using water, as it can leave residue or streaks on the panels.
