

Which lead-acid battery has a two-year warranty

What is the warranty on a lithium ion battery?

For a lead-acid battery, the most common warranty period is 1 year. Most lithium-ion batteries, however, come with a warranty period of 5 years. Certain manufacturers of lead-acid batteries may mention a '1+1 year warranty', but this does not mean it has a 2-year warranty.

Should you buy a lithium-ion or a lead-acid battery?

When deciding between a lithium-ion and a lead-acid battery, the length of the warranty is an important consideration since batteries can be expensive. Lithium-ion batteries offer warranties for longer periods, such as five to six times longer than a lead-acid battery. Here are some applications where people might choose between these two battery technologies.

What is the warranty on Exide Batteries?

The label on every Exide battery specifies the total number of months covered by the free replacement period and the Pro-Rata period for batteries fitted in private cars, multi-utility vehicles*, two-wheelers, inverters, gensets and solar applications. In all cases the warranty is applicable from the date of sale to the original purchaser.

What are the different types of lead acid batteries?

Type: Diehard Gold Lead Acid Batteries are the most common and less expensive than Platinum. Even though they don't have quite the same leak-proof reputation as AGM batteries, they last far longer than standard batteries. CAA: There are 640 CAA and 800 CA available in Diehard Gold.

How long is a lead-acid battery warranty?

For a lead-acid battery, the most common warranty period is 1 year. Certain manufacturers may advertise a '1+1 year warranty', but this is just a marketing gimmick and does not mean the battery has a 2-year warranty.

What is the design life of a lead acid battery?

Europe took a different tack. The Eurobat Guide for the Specification of Valve Regulated Lead-Acid Stationary Cells and Batteries defines design life as follows: "The design life is the estimated life determined under laboratory conditions, and is quoted at 20 \pm 176;C using the manufacturer's recommended float voltage conditions." 6
